# SUPPORT SHEER LINE

Knee Socks, Stockings and Tights designed for dynamic women who need the preventive action of elastic compression but don't want to compromise on style.

This elegant product line features a true heel, an anti-shrink cuff and super soft fabrics. Available in two compression levels (medium and strong) and in beige or black.

**Medium compression level: 70 den - 10-14 mm/Hg at the ankle**  
Ideal for those who would like to initiate a prevention programme, but are mainly interested in the comfort and well-being offered by elastic compression stockings.  
Composition: 84% polyamide, 16% elastane (Stay ups, Pantyhoses).  
85% polyamide, 15% elastane (Knee-highs).

**Strong compression level: 140 den - 15-21 mm/Hg at the ankle**  
Ideal for those suffering from the initial signs of ankle swelling and discomfort.

This level of compression is recommended for initial onset of varicose veins. The product's compression level supports and massages the leg, providing effective relief throughout the day. While this product line boasts an elegant design, particular attention has also been paid to maximum elasticity, which is ensured through the use of a honeycomb fabric (net fabric).

Doctor consult is recommended before use.  
Composition: 79% polyamide, 21% elastane.
